Form Logic - 2020 CARES Dataset

#17 – Destination Hospital & #32 – End of Event

Logic: #17 must be completed if #32 is coded as Pronounced in the ED or Ongoing Resuscitation in ED. No value should be passed for #17 if #32 is coded as Pronounced in the Field or Effort ceased due to DNR.

#22 – Who Initiated CPR
Answer choices: Not Applicable
                 Bystander
                 Family Member
                 Healthcare Provider (non-911 Responder)
                 First Responder
                     Did Law Enforcement initiate CPR?: Yes
                                                        No
                 EMS Responder (transport EMS)

#23 – Type of Bystander CPR Provided
Answer choices: Compressions and Ventilations
                 Compressions only
                 Ventilations only
                 Unknown

Logic: #23 (optional) can ONLY be completed if Bystander, Family Member, or Healthcare Provider (non-911 Responder) is selected for #22 and a value should be passed here if the agency is collecting this field. #23 grays out if Not Applicable, First Responder, or EMS Responder (transport EMS) is selected for #22 and a value should not be passed.

#25– Was an AED Applied Prior to EMS Arrival
Answer choices: Yes, with defibrillation
                 Yes, without defibrillation
                 No

#26 – Who First Applied the AED
Answer choices: Bystander
                 Family Member
                 Healthcare Provider (non-911 Responder)
                 Law Enforcement First Responder
                 Non-Law Enforcement First Responder

Logic: If #25 is coded "No", #26 grays out and a value should not be passed. If #25 is coded with either of the "Yes" options, #26 must have a value passed.

Logic: When sending v3.4.0 data, if #26 is coded as "First Responder", then a value must be passed for the qualifier, "Was AED applied by Police" and this will map to the updated answer choices of Law Enforcement First Responder when PoliceAED = Yes and Non-Law Enforcement First Responder when PoliceAED = No. If #26 is coded as Bystander, Family Member, or Healthcare Provider (non-911 Responder), a value should not be passed for the v3.4.0 qualifier field "Was AED applied by Police".

#27 – Who First Defibrillated the Patient
Answer choices: Not Applicable
                Bystander
                Family Member
                Healthcare Provider (non-911 Responder)
                Law Enforcement First Responder
                 Non-Law Enforcement First Responder
                EMS Responder (transport EMS)

Logic: If #27 is coded as "First Responder", then a value must be passed for the qualifier, "Did Police defibrillate the patient" and this will map to the updated answer choices of Law Enforcement First Responder when PoliceDefib = Yes and Non-Law Enforcement First Responder when PoliceDefib = No. If #27 is coded as Not Applicable, Bystander, Family Member, Healthcare Provider (non-911 Responder), or EMS Responder (transport EMS), a value should not be passed for the v3.4.0 qualifier field "Did Police defibrillate the patient".
