

CARES Fact Sheet

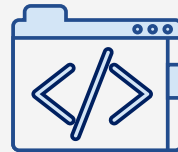

CARES helps local EMS administrators and community leaders determine:

- Who is affected in my community?
- When and where are cardiac events happening?
- What parts of the system are working well?
- What parts of the system could work better?
- How can we improve emergency cardiac treatment?

CARES Annual Call Volume

Uses a secure, HIPAA-compliant, Web database with restricted access for authorized users.

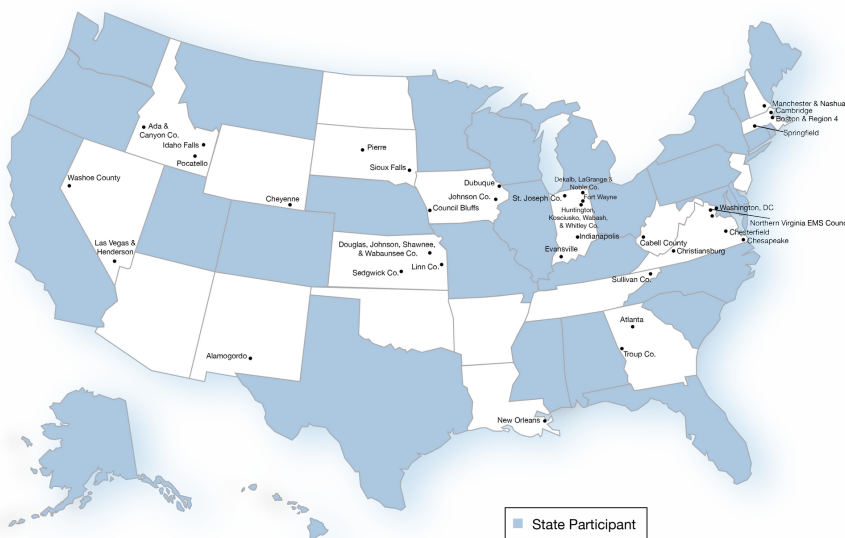

Accepts a variety of input methods, such as uploaded data files or online data entry.

Collects and links data from multiple sources including dispatch, 911 responders, and hospitals to create a single record for each OHCA event.

Allows longitudinal, internal benchmarking of key performance indicators through multiple reporting features, including charts, graphs, and maps.

- Covers a catchment area of more than 160 million
- 30 statewide registries
- 45 additional communities in 16 states
- More than 1,900 EMS agencies
- More than 2,200 hospitals
